

# Are you technically inclined?

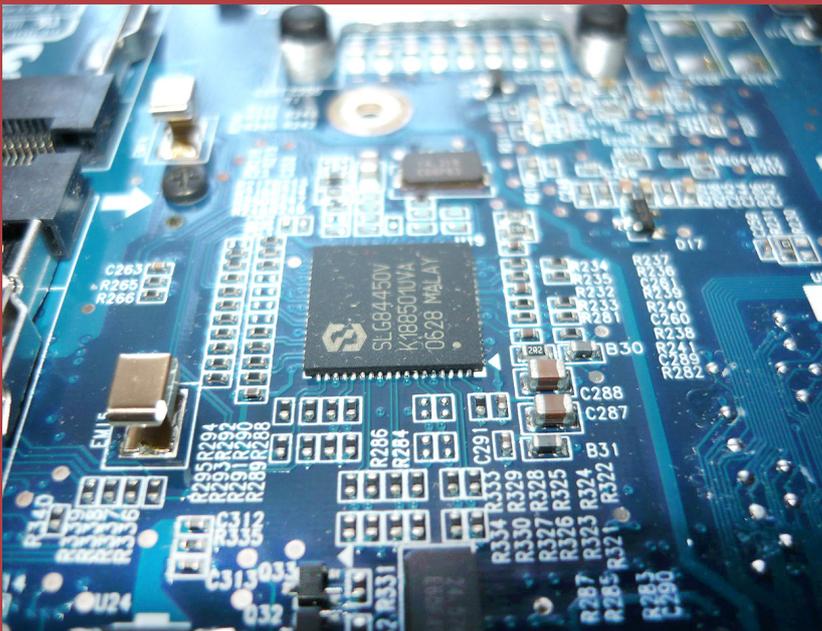

## Namibian Institute of Mining and Technology

**N**amibian Institute of Mining and Technology (NIMT) offers engineering trades such as autotronics, boilermaking and welding, fitting and turning, petrol and diesel mechanics, electrical millwrighting, air-conditioners and refrigeration mechanics, instrumentation as well as electrical mechanics systems.

In the building and civil trades you can study carpentry and joinery, clothing production, plumbing and sheetmetalwork or bricklaying and plastering.

Application forms are available in the national newspapers prior to the application dates. They have to be completed and sent to the NIMT. Students will be informed if they had been successful. Applications are subject to a selection process.

To apply you need to be at least 16 years old. You should also have passed Mathematics, Physical Science and English in Grade 10. You will be required to pass an medical test and an aptitude test (if required by NIMT).

**Windhoek Vocational Training Centre (WVTC)**

**D**o you live in Nakayale, Okakarara, Rundu, Ongwediva, Windhoek or Katima Mulilo? These towns all have Vocational training centres.

Prospective candidates are advised to apply by September each year. Candidates should submit a written application, which should include the following documents: proof of Namibian citizenship, Grade 10 certificate (including passes in Mathematics, Science and English ). You should be at least 16 and you will require a reference letter form your School Principal.

Short listed candidates are normally required to sit for a psychometric (aptitude) test and interview, which is administered during the second week of January. Training usually commences during the second week of February.

In the mechanical trades you can become an automotive mechanic, boilermaker, fitter (machinery), welder and fabricator as well as a fitter and turner. In the building trades you can become a joinery and cabinet maker, bricklayer and plasterer as well as a plumber and pipe fitter. In the electrical trades you can become a radio and TV mechanic, air conditioning and refrigeration mechanic as well as an electrician (general). VTC also offers courses in information and technology where you can attain an international computer drivers license, do office administration or become a junior computer technician. Courses in clothing production and hospitality and tourism are also offered.

Go to their website, <http://www.wvtc.edu.na>, where you can get more information on the fees, accommodation and have a look at their photo gallery
