

**Selma Amutenya**

If a women's party comes into existence, maybe it will solve women's problems concerning children. A woman who has many children supports and takes care of them alone. Sometimes children do not know where their fathers are. Even if you know their whereabouts, they have no concern to support their children. In this case, they do not make efforts to contact their children. You can marry one man, after you have two children with him, he divorces you, you can marry another one and he does the same like the first one. You end up having many children with different fathers and you take all the responsibilities alone.

**Getrude Nangonya**

It is a good idea for women to have a women's party with aims and objectives directed to women's matters. Women face many problems, for instance, when you want a loan from the bank, you must always take your husband with you, because you alone cannot enter such contract.

**Zola Quinnen**

We should consider why women need to create a party and what are the problems which lead them to do so? It has been my concern that there are gender imbalances in both public and private sectors. Gender imbalances in the whole world should be addressed. I would like to see 50 per cent women in all decision making bodies in all sectors. Men always say that women are not capable of doing this and that. Let women occupy key positions and we will have a proof whether they are capable or not.

**Eve Garoës**

I think that a women's party will help us. You come home very tired from work and a man expects you to cook for him. Even if you do much work for him, he does not appreciate you. You love your boyfriend and you think he loves you too. After you get pregnant he can leave you and goes to another woman. You wonder what kind of love he has.

Women, especially young girls must avoid unwanted pregnancies by using preventative measures. A man who rapes a woman must be sentenced to prison for many years. Decisions to solve these problems need strong women's voices.
